Finished-product samples. Raw-material and bulk specifications agreed separately.

Your route from origin to commercial opportunity.

Cowries Group Ltd acts as a UK commercial agent for manufacturers, producers and farmers. This brochure covers Nigerian-origin agricultural raw materials and products, matched to the requirements of business buyers.

01

Understand the requirement

We start with the product, intended use, grade, quantity, packing and delivery destination your business needs.

02

Coordinate the supply brief

We develop sourcing enquiries with producers and manufacturers and coordinate the available product and origin information.

03

Support buyer assessment

We coordinate documentation, sample discussions and technical questions, with testing and sample arrangements agreed individually.

04

Agree the commercial route

Quotation, representation, delivery responsibilities, payment and supply terms are documented for the specific opportunity.

For buyers and producers

Buyers: send your procurement brief. Manufacturers, producers and farmers: tell us what you produce, where, your available capacity and supporting product information. Agency mandates and any commission or exclusivity terms are agreed in writing.

Product images are illustrative references informed by supplied catalogue material. Actual batch, grade, packaging and availability are confirmed before an order.

Spices and specialist products

Specification criteria below are agreed for each order; they are not batch test results.

Dried ginger

FORM Whole or split dried ginger; pieces or powder by enquiry.

SPECIFICATION Moisture, volatile oil, ash and particle size. Agree treatment, microbiology, residues and relevant contaminant testing.

PACKING Lined bulk bags or retail packs; net weight agreed.

The photograph shows dried material, matching the advertised form.

Bitter kola

FORM Garcinia kola seeds; product form and processing agreed to the buyer brief.

SPECIFICATION Botanical identity, origin, size, moisture, condition and traceability. Evidence and tests depend on the intended use.

PACKING Sample and bulk packing assessed by enquiry.

Specialist sourcing enquiries. Intended use and destination-market requirements are assessed before a supply offer.

Dried hibiscus

FORM Dried calyces, commonly sold as hibiscus flowers; whole or cut.

SPECIFICATION Botanical identity, moisture, cut size, foreign matter, colour and infusion profile; relevant microbiology and residues.

PACKING Retail or bulk packs; net weight and packing agreed.

For ingredient and beverage sourcing enquiries, subject to the agreed specification.

Nuts and seeds

Specification criteria below are agreed for each order; they are not batch test results.

Edible cashew kernels

FORM Shelled edible kernels; whole or broken, raw or roasted form agreed.

SPECIFICATION Kernel grade and count, whole/broken ratio, moisture, colour and defects; shell removal and relevant contaminant checks.

PACKING Sealed food-contact bags or cartons; weights agreed.

Contains cashew nuts. In-shell nuts are a separate product and are not pictured as edible kernels.

Groundnuts

FORM Raw or roasted kernels; skin-on or blanched form by enquiry.

SPECIFICATION Kernel size, moisture, defects and roast level. Agree aflatoxin B1/total aflatoxins, microbiology and rancidity checks.

PACKING Retail or lined bulk packs; process and weights agreed.

Contains peanuts. Ingredients and additives, if used, are declared.

Sesame seeds

FORM Seed colour and hulled or unhulled form agreed before supply.

SPECIFICATION Purity, moisture, foreign matter, colour and oil content where required; Salmonella, residues and origin-specific import controls.

PACKING Retail or bulk enquiries; final packing agreed.

Contains sesame. Shipment requirements are checked for the specific origin and product.

Spices and staple ingredients

Specification criteria below are agreed for each order; they are not batch test results.

Turmeric

FORM Dried whole turmeric fingers or ground turmeric.

SPECIFICATION Moisture, curcuminoids, ash, particle size and colour; identity, adulteration, relevant residues, metals and microbiology.

PACKING Lined bulk bags or retail packs; net weight agreed.

No organic, medicinal or health claim is made.

Garri

FORM White or yellow cassava granules; ingredients and palm oil addition declared.

SPECIFICATION Granule size, moisture, acidity and colour; cyanide/hydrocyanic acid and microbiology to the agreed food-safety specification.

PACKING Retail or bulk bags; ingredients, label and weights agreed.

Processing, storage and supported shelf life are confirmed for the proposed batch.

Yam flour

FORM Yam flour; species, production process and ingredient declaration agreed.

SPECIFICATION Moisture and sieve size; cooking or pasting performance where required; relevant microbiology and cross-contact controls.

PACKING Retail pouches or lined bulk bags; net weight agreed.

The flour image represents the supply form; whole yam tubers are a separate enquiry.

Flour, oil and shea

Specification criteria below are agreed for each order; they are not batch test results.

Sweet potato flour

FORM Flour; variety, colour, process and ingredients agreed.

SPECIFICATION Moisture, sieve size, colour and starch/sugar profile where needed; microbiology and cross-contact information.

PACKING Retail pouches or bulk bags; weights agreed.

Any gluten-free or other specialist claim requires supporting evidence.

Palm oil

FORM Nigerian-origin food-grade palm oil; unrefined or other agreed processing.

SPECIFICATION Free fatty acids, peroxide value, moisture, impurities and colour. Agree authenticity and relevant contaminant evidence.

PACKING Sealed food-contact containers; retail or bulk by enquiry.

Food-use suitability, true origin, traceability, packaging and shipment requirements are checked before supply.

Shea butter

FORM Shea butter; processing, grade and intended application agreed.

SPECIFICATION Free fatty acids, peroxide value, moisture, impurities, melting profile, colour and odour; identity and application-specific testing.

PACKING Tubs or bulk formats; net weight and packing agreed.

Finished-product samples are available at Cowries Mart, Gainsborough. Assessment by arrangement. Raw-material grade and intended-use suitability are assessed separately.

A clear specification. A documented supply route.

For every proposed supply, we work from the buyer brief and the producer evidence. Samples, testing, packing and delivery are agreed for the specific opportunity.

01

Share the brief

Company and contact details; product and intended use; target specification; trial or recurring quantity; packaging and delivery destination.

02

Review the evidence

Nigerian origin, producer information, traceability, production capability, available specification sheets and relevant laboratory reports.

03

Assess and agree

Agree sample arrangements, technical acceptance criteria, inspection and any destination-market requirements before a supply offer.

04

Confirm the order

Document the approved product and batch, quantity, price, currency, delivery terms, importer responsibilities and payment arrangements.

Continue the learning

Gabriel Adejoh's Wealth Education Guide provides the educational background. This brochure turns that discussion into a product brief, sample assessment and commercial enquiry.

Beyond Your Local Market - dried ugu, palm oil and plantain chips.

[Watch the original lesson](#)

Buyer needs before the pitch - understand the information different buyers need.

[Watch the buyer-readiness lesson](#)

The videos provide educational examples. Current batch details and commercial terms are confirmed through Cowries for the specific enquiry.

Bring us your procurement brief.
